How To Use The Tipper Function

Tipping The Trailer

- Ensure trailer is correctly connected to your vehicle
- Park on flat, level ground and apply vehicle hand brake
- Remove R clips and release the 2 safety latches on front of trailer box
- Release and turn the 2 spring latches on drawbar to secure in unlocked position
- **Ensure all 4 latches are unlocked**
- Lift the front of the trailer box gently until rear of trailer is on the ground
- **Do not force or jerk the trailer**

Returning Tipper To Locked Position

- Lower the trailer box slowly and carefully to draw bar
- Turn and re-engage the 2 spring latches on drawbar
- Secure the 2 safety latches on front of trailer box and fit R clips in place
- **Ensure all 4 latches are secured before driving**

- **Remember to only ever use tipper function when the trailer is connected to your vehicle**
- **Do not stand behind trailer while tipping**
- **Keep hands and feet clear of moving parts**
